

AI ON YOUR OWN HARDWARE SPLAY NODE

Splay installs an AI machine in your building. You own the hardware. In the standard configuration, files and model traffic stay local, and the system blocks connections to external AI models.

THE MACHINES / NODE 01-04

SELECTED CONFIGURATIONS

01

DRAFT

Prepare document drafts and correspondence for staff review.

02

SEARCH

Find information in internal files and records.

03

ANALYZE

Summarize records and compare documents.

04

BUILD

Create scripts and internal tools for recurring tasks.

FROM \$14,500 INSTALLED	90-DAY LAUNCH CARE INCLUDED	PILOT / \$2,000 CREDITED
-------------------------	-----------------------------	--------------------------

PRE-ORDER ONLY / PRICES SUBJECT TO CHANGE

OWNERSHIP AND ACCESS

You own the hardware and control staff access through your network.

01

LOCAL PROCESSING

The standard configuration keeps files and model traffic local. It can run without public internet.

02

STAFF ACCOUNTS

Staff use the Node over your network. There is no per-user fee, within hardware capacity.

03

USAGE COSTS

Splay does not charge per response or impose a usage quota. Capacity depends on the hardware.

04

SYSTEM CONFIGURATION

Models and internal tools can change as your requirements change.
